

MULTILINE

Transactions: Uploading of credit transfers in XML-format possible

The new SEPA format for European credit transfers is now supported.

This MultiLine version supports European credit transfers (SEPA Credit Transfer)

The XML files can now be uploaded in the SEPA PAIN001.01.03 format via your usual MultiLine file upload function.

On the ABBLwebsite www.abbl.lu you will find a description of **XML SCT**

Please contact your bank adviser who will be pleased to communicate to you all required steps.

Note: The current format of credit transfers (VIR2000) will still be supported.
